

Military & Aerospace Products

Taking
technology
interconnection
products to a **New**
Level.

Amphenol

EMI and EMP Filter Connectors and Adapters . . . provide protection for sensitive circuitry in sophisticated avionics.

ARINC 600 Rack and Panel Connectors . . . Up to 800 contact capacity with low insertion forces.

Ordnance Connectors . . . MIL-STD-1760 electrical interfaces between aircraft and its stores.

Amphenol
can provide
the advanced
interconnect
solution
you
need.

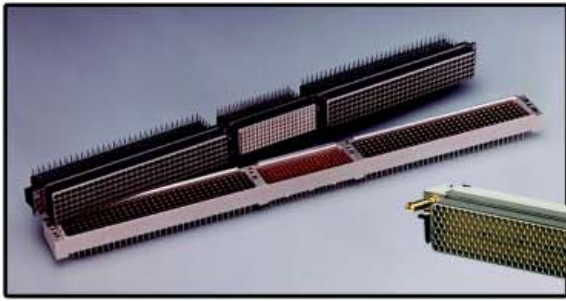

Not just a connector
supplier,
Amphenol
sales and engineering
teams
to be involved
design level.

Micro-D Solutions . . . MIL-DTL-83513 rack and panel connectors offering packaging densities of .050 in. contact spacing for tight space applications.

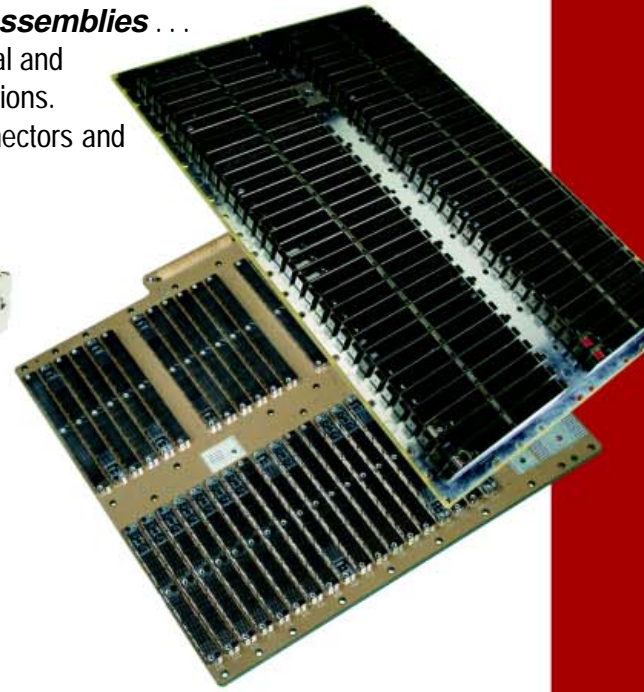

Hybrid Breakaway Connector . . . an Ordnance Connector, meeting the requirements of MIL-STD-1760. With improved durability composite shell.

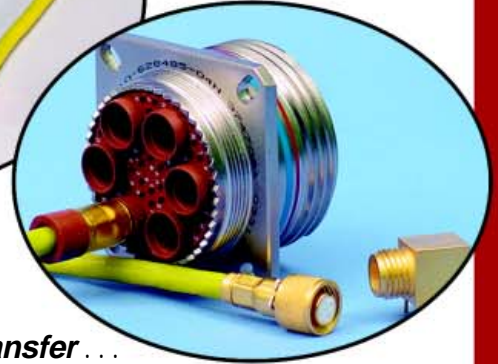

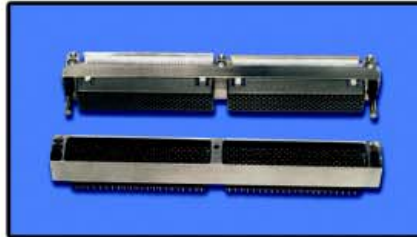

Backplane Assemblies . . .

Electrical, optical and hybrid combinations. Backplane connectors and systems.

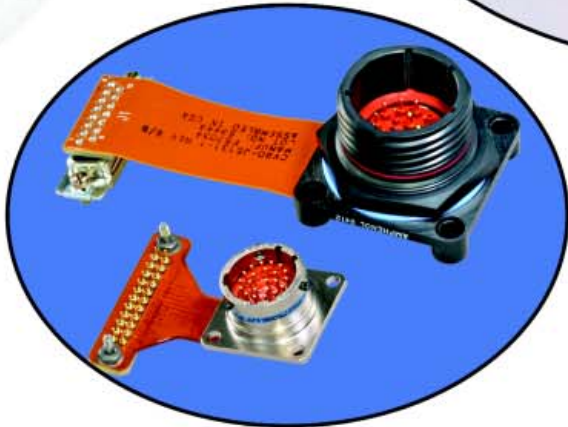

LRM, UHD and Ruggedized VME64-X Interconnects . . .

High density modular and backplane connectors are available in SEM-E and custom form factors, plus styles for attachment to VME64X boards.

Contacts for High Speed Data Transfer . . .

Quadrax, differential twinax, coax, triax, twinax contacts and transition adapters for high performance D38999 connectors.

Flex Circuitry Solutions

Plug into a printed circuit board, reducing space requirements and lowering installation costs.
